

10ばいの数をうまく使って

◆ 10倍の数をうまく使って，わり算をしましょう。

(1) $56 \div 4$

$$56 \begin{cases} \nearrow \square \div 4 = \square \\ \searrow \square \div 4 = \square \end{cases} \rightarrow \text{答え} \square$$

(2) $48 \div 3$

$$48 \begin{cases} \nearrow \square \div 3 = \square \\ \searrow \square \div 3 = \square \end{cases} \rightarrow \text{答え} \square$$

(3) $76 \div 4$

$$76 \begin{cases} \nearrow \square \div 4 = \square \\ \searrow \square \div 4 = \square \end{cases} \rightarrow \text{答え} \square$$

(4) $91 \div 7$

$$91 \begin{cases} \nearrow \square \div 7 = \square \\ \searrow \square \div 7 = \square \end{cases} \rightarrow \text{答え} \square$$

(5) $85 \div 5$

$$85 \begin{cases} \nearrow \square \div 5 = \square \\ \searrow \square \div 5 = \square \end{cases} \rightarrow \text{答え} \square$$

(6) $60 \div 5$

$$60 \begin{cases} \nearrow \square \div 5 = \square \\ \searrow \square \div 5 = \square \end{cases} \rightarrow \text{答え} \square$$

(7) $84 \div 7$

$$84 \begin{cases} \nearrow \square \div 7 = \square \\ \searrow \square \div 7 = \square \end{cases} \rightarrow \text{答え} \square$$

(8) $112 \div 7$

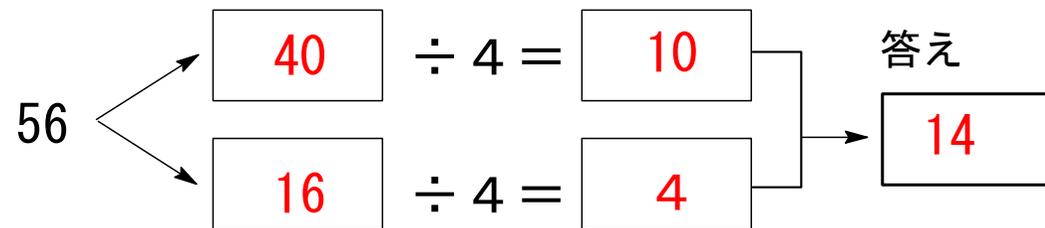

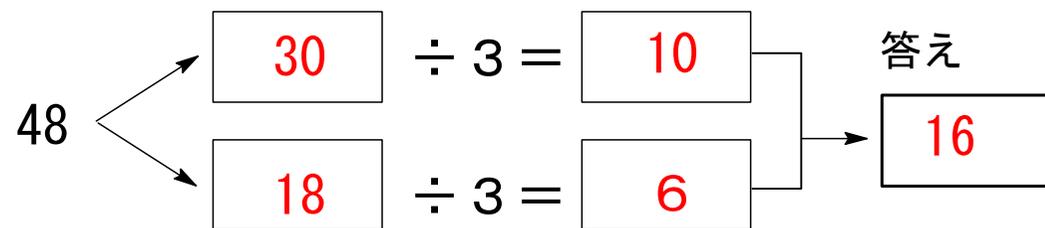

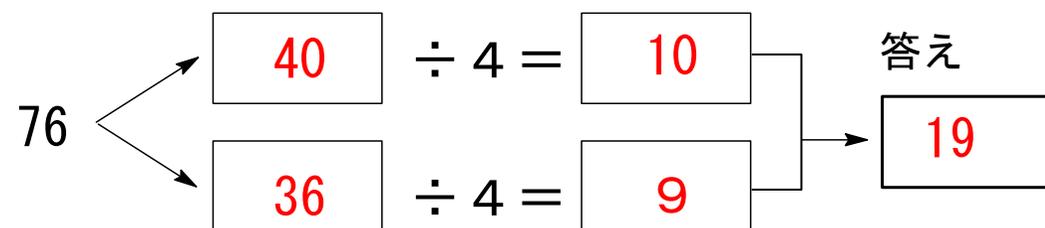

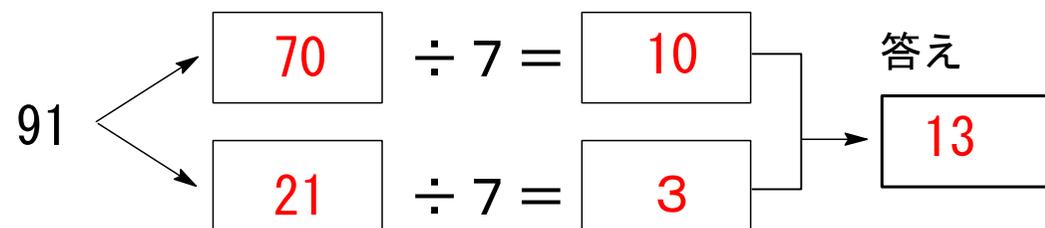

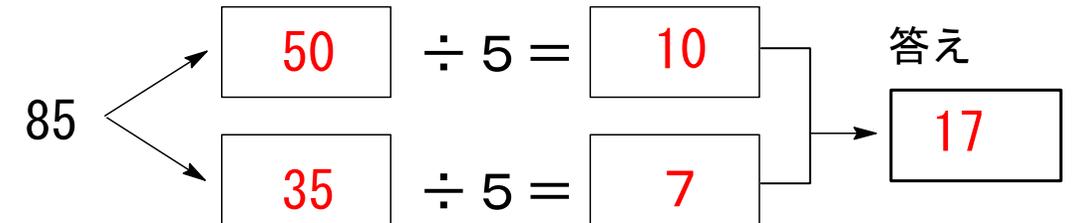

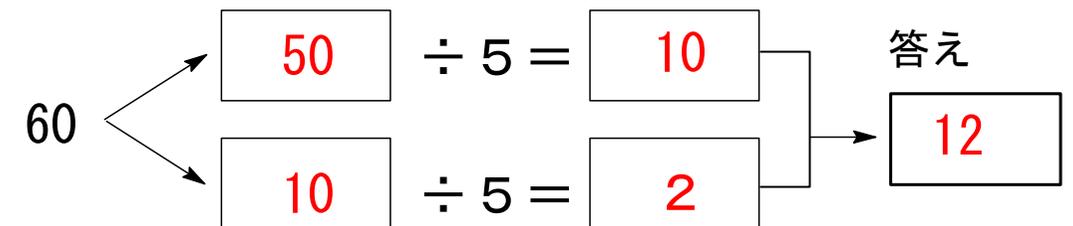

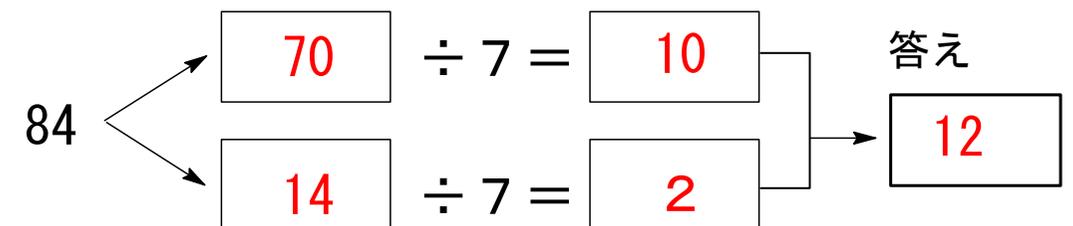

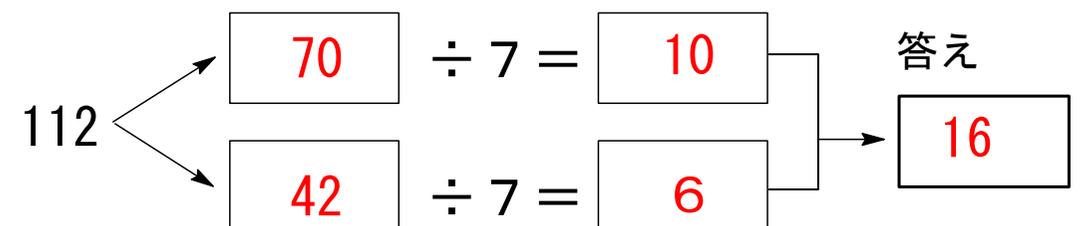

$$112 \begin{cases} \nearrow \square \div 7 = \square \\ \searrow \square \div 7 = \square \end{cases} \rightarrow \text{答え} \square$$

10倍の数を使うと，かんたんにわり算ができるね。
